Summary

CS undergraduate (CGPA 9.63/10) with hands-on experience building full-stack systems, AI/ML pipelines, and data analytics solutions using Python, SQL, and REST APIs. Shipped production projects involving CNN-based inference, real-time data management, and analytics dashboards. Experienced with Tableau, Streamlit, and Power BI. Open to full-stack development, AI/ML, and data analyst roles.

Education

SRM Institute of Science and Technology, Ramapuram
B.Tech in Computer Science Engineering — CGPA: 9.63/10

Chennai, India
2023 – 2027

Experience

Web Development Intern

May 2026 – Jun 2026

Vault of Codes

Remote

- Building and integrating frontend/backend features using REST APIs, TypeScript, and Python; delivering reliable, well-documented code.
- Collaborating with the engineering team to debug system components and ensure consistent behaviour across deployed features.

Data Analytics Job Simulation

Mar 2026

Deloitte Australia (Forage)

Remote

- Analysed enterprise datasets in Excel; built Tableau dashboards to surface business insights for non-technical stakeholders.

Projects

GreenTrack | [Live Demo](#) | *HTML, CSS, JavaScript, Python, CNN, SQL*

2026

- Built a full-stack plant monitoring platform with Python backend, REST API, user authentication, and image-based health records.
- Integrated a CNN disease detection module with reliable inference across varied leaf image inputs.

Gym Admin & Analytics Platform | [Live Demo](#) | *Python, MySQL, Pandas, Streamlit* | Open Source

2026

- Designed a MySQL schema for live member subscription and attendance data; built a real-time QR attendance pipeline with fallback handling.
- Developed Streamlit dashboards surfacing membership trends and peak-hour insights as actionable business intelligence.

Sign Language Translator | *React, Python, TensorFlow, MediaPipe, LLM, REST API*

2025

- Built a real-time web app translating sign language gestures to text via a TensorFlow/MediaPipe model over REST API; ensured reliable end-to-end data flow.
- Optimised performance with lazy loading and React hooks; validated mobile-first responsiveness and cross-browser compatibility.

ML-Based Fitness Tracker | *Python, Machine Learning*

2025

- Built a modular ML health tracking system generating personalised insights from user activity data with clean data/model/output separation.

Technical Skills

Languages: Python, C++, JavaScript, TypeScript, SQL, HTML/CSS

Frontend: React, Next.js, Tailwind CSS, Figma

Backend & APIs: FastAPI, Node.js, Express.js, REST APIs, MySQL, MongoDB

Data & Analytics: Pandas, NumPy, Matplotlib, Streamlit, Tableau, Power BI

AI & ML: CNN, Machine Learning, Generative AI

Tools: Git, GitHub, Vercel, Render, VS Code

Certifications

Python for Data Science (NPTEL) · Introduction to Machine Learning (NPTEL) · Full Stack Web Development (Udemy) · SQL & Relational Databases 101 (IBM) · Introduction to Generative AI (Google Cloud)

Achievements

Hackathons: SIMATS TechTrove'25 · Google Solution Challenge · Guidewire DEVTrails University Hackathon

Conference: Presented paper on Smart Agriculture & Deep Learning at ICSIE'26 (17th International Conference) | **Delegate:** Malaysia (Mar 2024) & Singapore (Feb 2025)
